

VIDEO CONFERENCING CAMERA

# V-Meet 4K Camera

USB camera with 4K resolution

# V-Meet 4K

V-Meet 4K is a high image quality video device for business and education purposes, capable of outputting UltraHD resolution video stream along with clear audio from its dual-microphone array. Low noise image sensor and autofocus lens ensure the clear view even in dim-light or contrasty environments. Video camera utilizes intelligent software for face detection and automatic framing of participants. When device recognizes one meeting participant speaking, it automatically focuses on the face and shifts its microphone array pick-up beam towards the speaker for clear and isolated voice. Setting up V-Meet 4K can be as easy as plugging in a single USB cable. Although designed for fully-automated operation (suitable for most users), device provides plenty of manual controls that can be accessed with included IR remote control.

Technical Specifications	V-Meet 4K
Video output	4K UHD @ 30fps and lower resolutions
Sensor	1/2.5" CMOS
Effective pixels	8.29M
Lens	120° viewing angle
Zoom	8x digital zoom
Pan, tilt, zoom functions	Digitally simulated - ePTZ
Intelligent features	Auto-framing, wide dynamic range optimization, 2D and 3D noise suppression
Shutter speed	1/30s - 1/10000s
White Balance	Auto, Indoor, Outdoor, One Push, Manual, VAR
Backlight compensation	Manual on/off
Control options	Ir remote control (included)
Audio input	2 microphones in array with voice-focus feature
Audio pickup distance	6 m
Connections	USB 3.0 port, Type B
BRACKET	Universal - ready mount on top of monitor. Tripod mount: 1/4"-20 UNC thread
SIZE	195 mm x 93 mm 61 mm (bracket included)
Weight	300 g
